Media Wall Fires

eFlame Relax

Our fires are designed to perform and built to last, so just relax.

Manufactured using high quality materials and components, you can rest assured your fire will not just be an amazing centre-piece for your room, it will be safe and reliable for years to come.

State-of-the-art technology allows you to create the perfect ambience and temperature at the tap of a button or a holla to Alexa! We have a model to suit every room size, so grab a cuppa and have a flick through the brochure and dream about relaxing in front of your new media wall fire.

All fires come with a 5-year parts warranty for added peace-of-mind.

Hyper-realistic
LED flame picture
as standard on
all fires.

e**flame** Feature hot

Each fire in our range is feature hot, meaning whichever model you choose you're guaranteed to have all the latest tech to create your dream media wall.

Installation options

All our fires offer 3 installation options for ultimate design flexibility. Single-sided for flush mounting, hole-in-the-wall style 2-sided installation for mounting within a corner situation, or 3-sided installation where all three sides are visible. (see design tip opposite)

Fuel bed included

All fires have components supplied in the box ready for you to easily set up the fuel bed. Included in the box are high definition woodland logs, smoked tinted crystals, bark chips and granular material so you can really get creative and design your dream firescape.

Black Edition

Ultra-low reflectory rear black glass displays a hyper-realistic LED flame picture. 3 flame effects (Orange, White, Orange & White) along with separate controls for the fuel bed and overhead lighting give you optimum control to be able to create the perfect flame effect for any mood or occasion.

Energy efficient heater

Manually or thermostatically controlled, the 1.6kW energy efficient heater allows you to relax in the perfect temperature. Setting the temperature is easy thanks to the supplied remote, phone app, push buttons (on fire fascia), or simply ask Alexa.

design tip

Consider how you want your fire to integrate with your media wall. Is it recessed, do you want to show all 3 sides of the glass or would a corner fire work best for you?

All 3 options are included with an eflame fire.

Easy to control

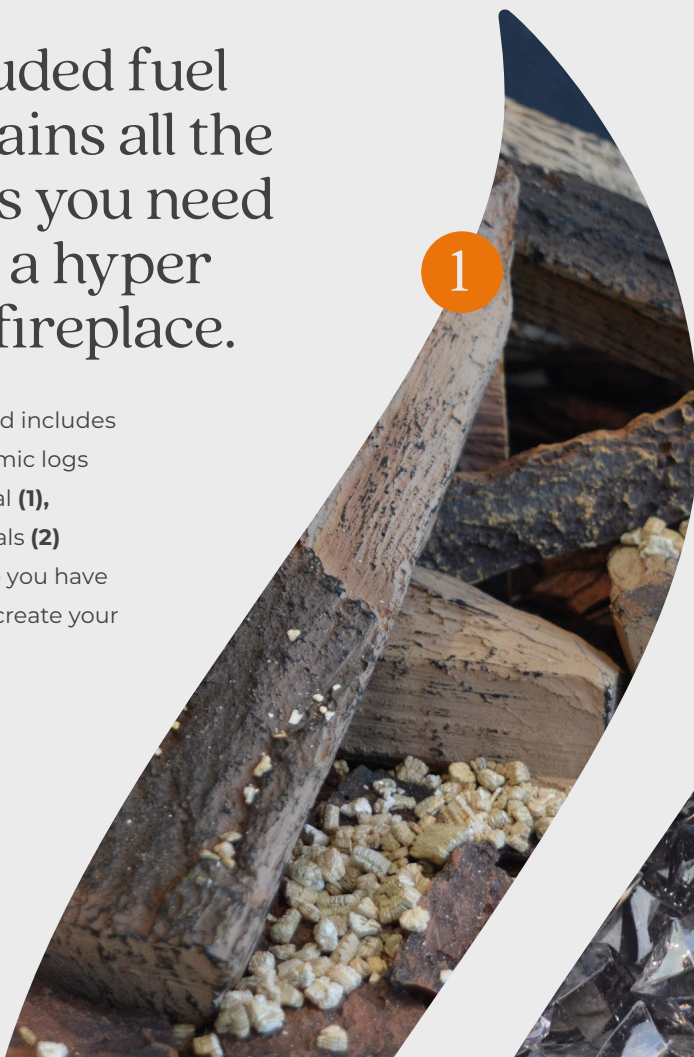

Control the flame effect, brightness and temperature using the remote control, through your phone using the supplied app, or connect to Alexa. Push button controls are also featured discretely on the fire fascia for manual control.

eFlame The Fuel bed

Our included fuel bed contains all the essentials you need to create a hyper realistic fireplace.

Our included fuel bed includes high-definition ceramic logs and granular material **(1)**, smoked tinted crystals **(2)** and bark chips **(3)** so you have plenty of options to create your perfect firescape.

design tip

Create an **ultra modern look** by using glass crystals on your fire bed, then set the lighting of the fire to a white hue. **For a more traditional firescape**, use logs on the fuel bed and set the lighting to a more natural orange and yellow hue to give a cosy glow.

Your fire deserves the finest log kit...

Premium Log Kit

Upgrade to our premium log kit for the ultimate in fuel bed realism.

Our premium log kits are hand-made using real logs, and create an ultra-realistic fuel bed. The log kit comprises variety of log sizes so you can design the perfect firescape.

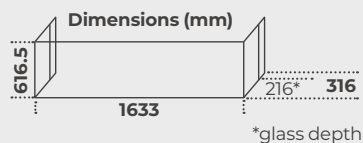

^ Made by hand and crafted from real logs for the ultimate realistic fuel bed.

e**flame** 1600 *Black Edition*

Our most popular panoramic media wall fire, the 1600 fits into most room sizes and creates a focal point you won't forget!

The eflame 1600 is designed with the latest LED technology, along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric media wall fire.

The flame effect can be set to 3 different colour settings and 4 different brightness levels. The overbed and underbed lighting has 15 different modes along with presets that you can easily control from the comfort of your chair using your phone, tablet or supplied remote control.

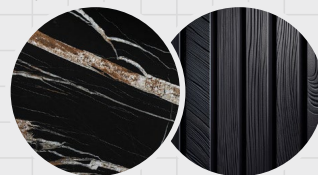

Full Spec **page 22**

For TV's up to size

60"

design tip

Use a mixture of materials on your media wall to create interest.

We've used dark wood slat wall panelling combined with an exotic granite that tones in with the coffee table, and results in the ultimate contemporary yet cosy scheme.

Try creating a mood board to test your ideas.

Ultra-realistic LED flame picture on non-reflective darkened glass

Overbed lighting and underbed glow with 15 settings

Independent ember lights with on/off function

Fuel bed includes high definition logs, crystals, bark chips & granular material

Efficient 1.6kW thermostatic heater

Control with full remote, app, Alexa or fascia push buttons

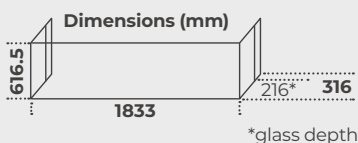

eFlame 1800

Black Edition

For slightly larger living spaces, the 1800 creates maximum impact and can be used with TV sizes up to 70”.

The eFlame 1800 is designed with the latest LED technology, along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric media wall fire.

The flame effect can be set to 3 different colour settings and 4 different brightness levels. The overbed and underbed lighting has 15 different modes along with presets that you can easily control from the comfort of your chair using your phone, tablet or supplied remote control.

Warranty

design tip

Be creative with your media wall design. A plain media wall with no storage may look great, but don't forget you can go to the full width of your wall if required and incorporate lots of useful storage like we have done here. **Incorporate LED lighting so you can really set the mood.**

Ultra-realistic LED flame picture on non-reflective darkened glass

Independent ember lights with on/off function

Fuel bed includes high definition logs, crystals, bark chips & granular material

Efficient 1.6kW thermostatic heater

Control with full remote, app, Alexa or fascia push buttons

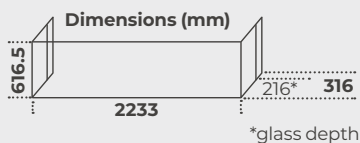

e**flame** 2200

Black Edition

For the largest living spaces, the 2200 creates a stunning panoramic statement, perfect with screens up to 85”.

The eflame 2200 is designed with the latest LED technology, along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric media wall fire.

The flame effect can be set to 3 different colour settings and 4 different brightness levels. The overbed and underbed lighting has 15 different modes along with presets that you can easily control from the comfort of your chair using your phone, tablet or supplied remote control.

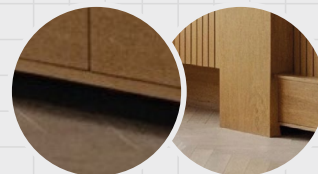

Full Spec **page 23**

For TV's up to size

85"

design tip

Create a floating effect with large spaces. This media wall uses a clever shadow gap at its base to make it look like it is floating. This breaks up the vast expansive wall into two sections and cleverly directs the eye towards the offset screen.

Ultra-realistic LED flame picture on non-reflective darkened glass

Overbed lighting and underbed glow with 15 settings

Independent ember lights with on/off function

Fuel bed includes high definition logs, crystals, bark chips & granular material

Efficient 1.6kW thermostatic heater

Control with full remote, app, Alexa or fascia push buttons

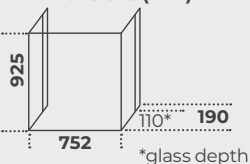

e**flame** 750sl *Black Edition*

Perfect for creating a statement in a smaller space or within a mantel. All the same tech as our other fires, but in a more slimline package!

The eflame 720sl is designed with the latest LED technology, along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric media wall fire.

The flame effect can be set to 3 different colour settings and 4 different brightness levels. The overbed and underbed lighting has 15 different modes along with presets that you can easily control from the comfort of your chair using your phone, tablet or supplied remote control.

design tip

Modern technology in a traditional format. This slimline fire looks stunning mounted within a mantel. Whether your style is focussed on the contemporary or traditional, this fire creates an authentic centrepiece to a traditional fireplace. Packed with the same technology as the rest of our range.

Efficient 1.6kW thermostatic heater

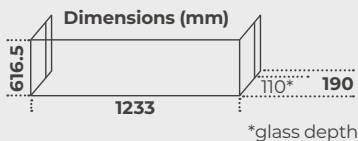

Control with full remote, app, Alexa or fascia push buttons

eFlame 1200sl *Black Edition*

An identical panoramic picture to the 1200, but with a slimline depth of only 190mm makes this fire perfect for the smaller space.

The eFlame 1200sl is designed with the latest LED technology, along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric media wall fire. The flame effect can be set to 3 different colour settings and 4 different brightness levels. The overbed and underbed lighting has 15 different modes along with presets that you can easily control from the comfort of your chair using your phone, tablet or supplied remote control.

Full Spec page 24

For TV's up to size
43"

design tip

Use the magic of paint to make your room appear longer or taller.

Particularly useful in smaller rooms where you want your room to appear longer, paint the whole media wall and either side in the same colour. Painting the media wall in a contrasting colour will make the room appear taller.

Ultra-realistic LED flame picture on non-reflective darkened glass

Overbed lighting and underbed glow with 15 settings

Independent ember lights with on/off function

Fuel bed includes high definition logs, crystals, bark chips & granular material

Efficient 1.6kW thermostatic heater

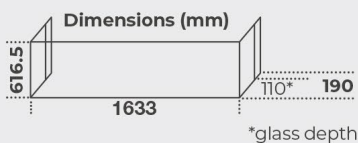

Control with full remote, app, Alexa or fascia push buttons

e**flame** 1600sl *Black Edition*

At 1600 wide, this slimline fire helps you create the feeling of a larger media wall in a smaller space without any compromises.

The eflame 1600sl is designed with the latest LED technology, along with darkened rear glass to reduce reflections and give the most realistic flame effect available in an electric media wall fire.

The flame effect can be set to 3 different colour settings and 4 different brightness levels. The overbed and underbed lighting has 15 different modes along with presets that you can easily control from the comfort of your chair using your phone, tablet or supplied remote control.

For TV's up to size
60"

design tip

Get creative with storage.

Don't forget every fire can be 1, 2 or 3-sided, meaning you can easily incorporate storage into one or both sides of your media wall.
